HacktionLab

Bristol Anarchist Bookfair 2013

"Technology, networks, collaboration & ciberagitation"

Ben, John & Mike

https://hacktionlab.org

Action packed contents

Intro

Schulze voting

Econsensus

Digital currency & mutual credit schemes

A whistle stop tour of Tor

Oracle & Sun Microsystems

Network23.org anonymous blogging platform
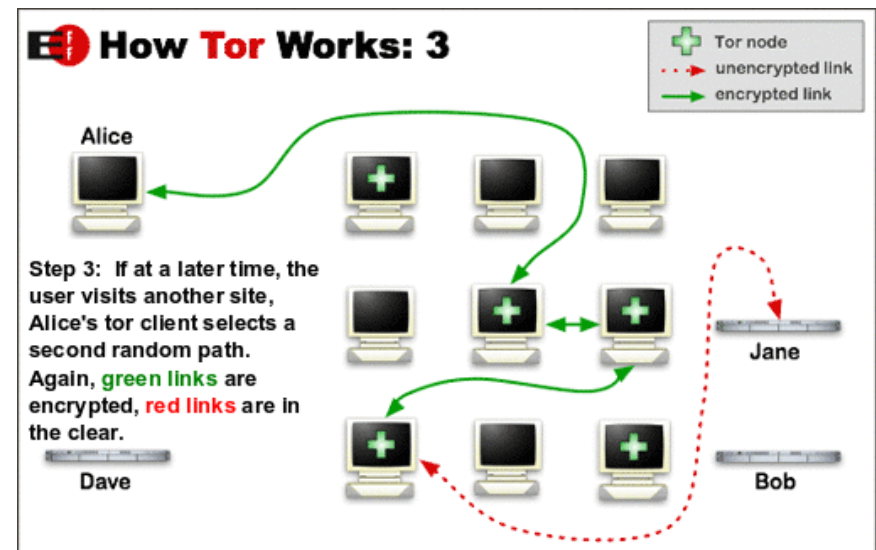

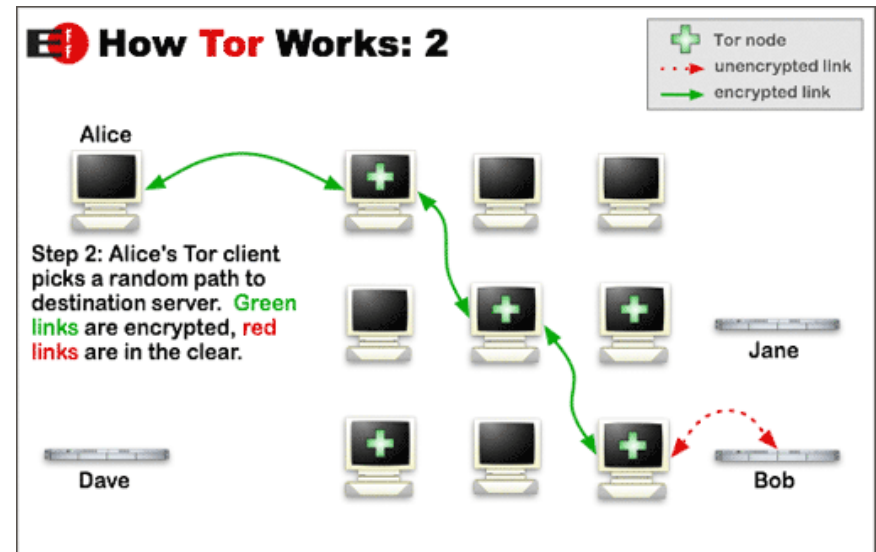

BarnCamp

Intro

- HacktionLab started in 2008

- Aim is to strengthen network of UK tech-activists and devise and promote projects to support UK activist community.

- 11 gatherings so far: seven urban hacklabs and four rual hacklabs

- Next rural gathering is BarnCamp on 7,8,9 June (more at end)

- Published Tech Tools for Activism booklet and web site – https://techtoolsforactivism.org

Econsensus

- Open system for helping groups and organisations discuss topics (easy), make proposals (harder) and come to decisions (hardest).

- Beta testing at the moment, you can use it in your org or group and help test it at:

- https://econsensus.org

- If you're interested get in touch afterwards.

Tor

- The Onion Router project.
- Tor is a "network of virtual tunnel that allows people to improve their privacy and security on the Internet".
- https://www.torproject.org

Digital Currency& Mutual Credit Systems

https://oxcred.org.uk/

Oracle's take-over ofSun Microsystems

Networks: https://network23.org

- Network23 – launched at Network X gathering in Manchester in 2011.

- Built on Wordpress software, which is the open source software distributed at wordpress.org **NOT** the commercial hosting service at wordpress.com.

- Wordpress.com OK, but it's commercial, it costs to do stuff, the log and farm your data, and they have no social or political contract not to take your web site down.

- Network23 offers an alternative, a volunteer run network of blogs.

- We're looking to help others to do the same, and … the network.

HACKTIONLAB IN ASSOCIATION WITH
